

NgomaCharts

Africa's music chart, certification & catalogue platform — project overview for external circulation.

PREPARED 30 JUL 2026
OPEN ALERTS 10

WHAT IT IS

Ngoma Charts publishes weekly and monthly music charts across African markets — singles and albums, ranked from streaming, sales, and airplay data supplied by partner platforms (Spotify, Apple Music, YouTube, Boomplay, Audiomack, TikTok, and others).

A CMS behind the public site lets the editorial team manage artists, releases, chart uploads, and gold/platinum/diamond certifications, backed by an automated data-quality audit that runs before anything is published.

PLATFORM MODULES

Artists	Profiles, verification, country & genre metadata	Songs & Albums	Release records, credits, artwork
Chart periods & uploads	Monthly/weekly data ingestion	Platforms	Scoring rules per streaming/sales source
Certifications	Gold, Platinum, Diamond thresholds	News & page content	Editorial & site copy
Media & reports	Assets and scheduled exports	Backups	Catalogue snapshots

OPEN ALERTS — THE SPECIFIC ENTRIES

Scope: no live connection to the production CMS/database is available from this session, so this isn't a live export. It's a full re-run of the audit's exact logic against every entry in the most complete real chart dataset on hand locally — the June 2026 Top 50 combined singles and Top 50 combined albums (72 credited artists across both). Real names and IDs throughout; live catalogue totals will run higher since this covers only one charted month.

72/72 ARTISTS INCOMPLETE & UNVERIFIED	13/72 ARTISTS MISSING COUNTRY	50/50 SONGS INCOMPLETE	5/50 SONGS MISSING COUNTRY
50/50 ALBUMS INCOMPLETE	5/50 ALBUMS MISSING COUNTRY	1 DUPLICATE ARTIST GROUP	0 DUPLICATE ALBUMS FOUND

Artists — covers "Artist detail sections incomplete," "Credited artists are unverified," "Artists missing country data," "Artist country codes need checking," and "Artist countries need verification"

Needed: fill in each artist's missing fields below, add a country + code where flagged, then confirm identity and switch on Verified. None of the 13 flagged codes are malformed — they're simply blank, so there's currently nothing to fix under "country codes need checking" beyond adding the code itself.

ID	ARTIST	MISSING PROFILE FIELDS	COUNTRY DATA	VERIFIED

Duplicate candidates — covers "Possible duplicate artists" and "Possible duplicate albums"

Artists — 1 group found: "PAPA NYOSTO" (#1043) and "Papa Nyosto" (#1064) — same name, different casing, filed as two separate artist records.
Needed: open Duplicate Review, confirm they're the same act, and merge the two into one canonical profile.

Albums — none found among the 50 June combined albums: no two entries share a normalized title + artist credit or a close spelling match.
